

Comparison of Region Based on Sales

Project 2

My Project Tableau public link: - [Project_02 | Tableau Public](#)

1. Select Sample Superstore as Dataset

- Use Sample Superstore Dataset
- Select Data
- Use Group by from Data Source Table on a Folder to create a folder to segregate the required data for Customer Name and Order ID inorder to organize the data thoroughly.

Dashboard 1

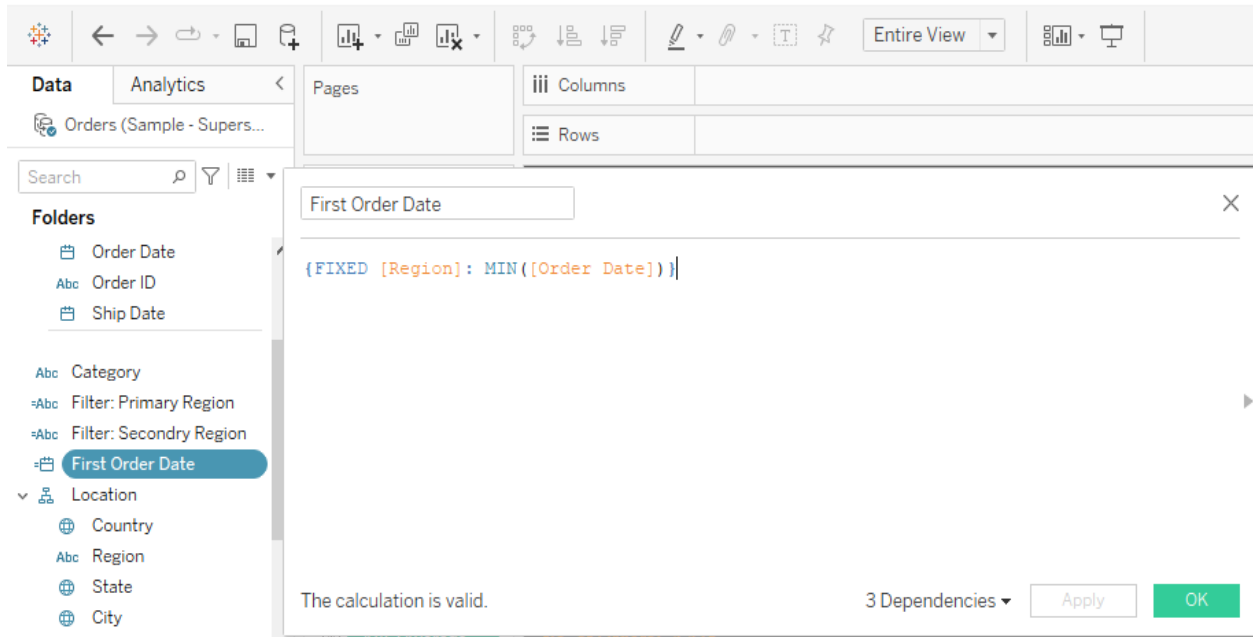

2. Create a hierarchy called Location for the variable Country.

3. Create two parameters: Primary Region and Secondary Region with all regions listed in them. Here, primary and secondary region are the two regions where the sales are being compared.
 - Create Parameters for Primary Region and Secondary Region
 - Create a Calculated Field for both Primary Region and Secondary Region

4. Create a First Order Date
 - Create a Calculated Field and name it as the First Order Date

5. Create a dashboard
 - Align all sheets in the dashboard
6. Partition the dashboard to display the below details of Primary Region and Secondary Region
 - First Order Date
 - Total Sales
 - Average Sales per Order
 - No. of Customers
 - No. of Orders
 - No. of Products in Sale
